Skills & Technologies

Python | JavaScript | TypeScript | Django | Django REST Framework | Flask | FastAPI | Node.js | Express.js | NestJS | React.js | Next.js | Vue.js | Nuxt | TanStack | Redux | Redux Toolkit | HTML5 | CSS3 | Tailwind CSS | Material UI | GraphQL | RESTful APIs | JWT Authentication | PostgreSQL | MongoDB | Redis | SQLite | Elasticsearch | Celery | Playwright | Docker | AWS | S3 | Git | GitHub | GitLab CI/CD | Nginx | Stripe | Prisma | LangChain | Hyperledger Fabric | Postman

Summary

Full Stack Developer with over 5 years of experience building robust, scalable web applications. Highly skilled in Python, Django, React.js, and Next.js, with a strong foundation in backend development, API integration, cloud-based deployment, and frontend UI/UX engineering. Passionate about writing clean code, solving complex technical problems, and staying current with modern web and cloud development trends.

Experience

Software Engineer

Ubiquify, Lahore, Pakistan

Oct 2025 – Present (Full-time)

- Led the development of production web applications using Django REST Framework, React, Next.js, and TanStack for construction, healthcare, and operations clients.
- Built RESTful APIs, Celery background workers, and Playwright automations for dealer list exports and listing scrapes.
- Implemented fax OCR and patient intake workflows for United Rehab, including RingCentral integration and document parsing.
- Integrated Procore field reports and billing/draw tracking for Keeley Construction, along with an MCP connector for job financial queries.
- Developed attendance and labor costing features (Antis) with Excel and PDF exports for job-site reporting.
- Built towing operations tooling (Park-and-Tow) covering voice calls, RingCentral recordings, and listing ingestion.
- Built LessonLoop, a K-12 educator portal for lesson planning and class surveys; CNTNDR, a white-label fitness platform with video and Stripe billing; and Everon, a dealer CRM for call, SMS, and email campaigns.
- Built RCS for street-video object detection, a T-Mobile plan Q&A prototype, Design Democracy for workplace layout voting, a scanner for Pakistan government tenders, and the Ubiquify marketing site.
- Owned features from first ticket through production, including staging deploys, client demos, and post-launch fixes.

Software Engineer

Arbisoft, Lahore, Pakistan

Aug 2021 – Oct 2025 (Full-time)

- Led the development of scalable production web applications using Django, Django REST Framework, and React.js with Next.js.

- Built RESTful APIs and microservices with Django and Flask, applying clean architecture, PEP8 standards, and token-based authentication (JWT).
- Developed dynamic frontend interfaces using React, Redux Toolkit, Tailwind CSS, and Next.js routing, with full responsiveness and accessibility.
- Integrated CI/CD pipelines using GitHub Actions and GitLab CI/CD for automated testing and deployment.
- Wrote unit, integration, and E2E tests using PyTest and Postman to ensure code reliability and improve regression cycles.
- Mentored interns and junior engineers through pair programming, code reviews, and technical documentation.
- Participated in blockchain innovation projects utilizing Hyperledger Fabric for access control systems and secure data exchange.
- Supported production releases for long-running clients, including bug fixes, performance work, and handoff to newer teammates.

Education

Namal University, Mianwali

Bachelor's in Computer Science (2017 – 2021)

Projects

1. Fitnesscity – Health & Wellness Web Platform

[Project Link](#)

A comprehensive platform for science-based health testing. Worked on frontend using Next.js to support scheduling DEXA, VO2 Max, and blood tests across 700+ locations.

Tech Stack: Next.js, React.js, JavaScript, HTML5, CSS3

2. Fashion Jackson

[Project Link](#)

Built FT Technologies' website with dynamic content delivery and product inquiry tools for wind sensor technology. Contributed to backend (DRF) and frontend (Next.js, Tailwind CSS).

Tech Stack: Django REST Framework, Next.js, Tailwind CSS, React.js, PostgreSQL

3. Equiem – Smart Building Management Platform

[Project Link](#)

Contributed across frontend and backend using DRF and Next.js to support tenant engagement, workspace operations, and real estate insights for global commercial properties.

Tech Stack: Django REST Framework, Next.js, React.js, PostgreSQL, REST APIs

4. Invaluable – Auction Marketplace

[Project Link](#)

Built responsive UI components using React and Next.js for auction listings and real-time bidding. Focused on improving user interaction across curated content.

Tech Stack: React.js, Next.js, JavaScript, HTML5, CSS3

5. Hippocratic AI – Healthcare AI Platform

[Project Link](#)

Worked on the frontend using Next.js and Strapi for managing conversational AI tools designed for clinical workflows and patient engagement.

Tech Stack: Next.js, Strapi, React.js, Tailwind CSS

6. Alithia Knowledge – AI Information Platform

[Project Link](#)

Developed interactive UIs in Next.js for managing AI agents and real-time knowledge querying, enabling smart exploration across multiple information streams.

Tech Stack: Next.js, React.js, Tailwind CSS, TypeScript

7. ComicKaze – Anime Merchandise E-commerce

[Project Link](#)

Built as a freelance project. Full stack development of anime merchandise store with seamless shopping experience.

Tech Stack: Django, React.js, Redux, PostgreSQL, Stripe, HTML5, CSS3

8. AXOCEAN – Affiliate E-commerce Platform

[Project Link](#)

Allows browsing of product designs and redirects users to Flipkart. Built backend with DRF and frontend with Next.js.

Tech Stack: Django REST Framework, Next.js, React.js, PostgreSQL, Tailwind CSS

9. Blockchain-based Access Control System

Enterprise-grade prototype using Hyperledger Fabric to manage secure access control and data validation in private networks.

Tech Stack: Hyperledger Fabric, Node.js, Docker, YAML, CLI

10. United Rehab – Referral Intake & Fax OCR

[Project Link](#)

Internal operations platform for outpatient rehab. Built fax OCR, patient intake, and insurance extraction workflows with RingCentral for inbound referrals.

Tech Stack: Django REST Framework, Celery, PostgreSQL, TanStack, React, AWS Bedrock, RingCentral

11. Automotive Strategies – Dealer List Automation

[Project Link](#)

Automated Toyota/LEO targeted list exports for automotive dealers. Playwright jobs build ZIP-segmented marketing lists and surface run status in the operator UI.

Tech Stack: Django REST Framework, Celery, Playwright, PostgreSQL, TanStack, React, Redis

12. Antis – Construction Attendance & Labor Costing

Digital attendance, labor costing, and job-site reporting for construction crews, including Excel and PDF exports used by the office team.

Tech Stack: Django REST Framework, PostgreSQL, TanStack, React, AG Grid, AWS RDS

13. Keeley – Field Reports, Billing & Procure

Construction internals for Keeley: Procure-synced field reports, billing/draw tracking, SMB file browsing, and a Claude MCP for job financial questions.

Tech Stack: Django, Celery, PostgreSQL, Redis, Procure API, TanStack, React, AG Grid, MCP

14. Park-and-Tow – Towing Operations Platform

[Project Link](#)

Operations hub for a towing company covering Retell voice calls, RingCentral recordings, Omadi listing scrape, and customer follow-up.

Tech Stack: Django REST Framework, Celery, Playwright, PostgreSQL, TanStack, React, Retell, RingCentral

15. LessonLoop – K-12 Educator Portal

[Project Link](#)

Educator portal for class loops, surveys, and AI-assisted lesson planning. Worked across the Nuxt frontend and Lambda/OpenSearch/Bedrock backend.

Tech Stack: Nuxt 3, Vue 3, AWS Lambda, DynamoDB, OpenSearch, S3, Bedrock, Node.js

16. CNTNDR – White-label Fitness Platform

[Project Link](#)

White-label fitness product for trainers: programs, workouts, HLS video, and Stripe subscriptions across admin, client, and landing apps.

Tech Stack: Next.js, NestJS, Prisma, PostgreSQL, Stripe, Bunny CDN, AWS S3

17. Everon CRM – Dealer Marketing Automations

CRM for auto dealers to onboard tenants and run lead-marketing automations including outbound calls, SMS, DMS hooks, and email campaigns.

Tech Stack: Django, Celery, PostgreSQL, Redis, React, Vite, Docker

18. RCS – Street Video Analysis

Ingests road video from S3, runs object detection (garbage, illegal parking, pedestrians), and overlays results on a map with SRT timing.

Tech Stack: NestJS, React, Vite, Leaflet, AWS S3

19. Mobile Expert – T-Mobile Plan RAG Chat

Crawls T-Mobile plan pages and answers questions with LangGraph/GPT-4 over embedded content. Built as a research prototype, not a carrier product.

Tech Stack: FastAPI, LangChain, LangGraph, OpenAI, Selenium, React, Vite

20. Design Democracy – Workplace Design Voting

Legacy Django/Vue platform where customers vote on office layouts, billboards, and buildings. Maintained the existing product and added requested features.

Tech Stack: Django, MySQL, Vue.js, Webpack

21. ABS Tender Scanner

Playwright scrapers across Pakistan PPRA/eProcure and related portals, with keyword matching and a dashboard of tenders worth reviewing.

Tech Stack: Express, TypeScript, Prisma, PostgreSQL, Playwright, TanStack, React

22. LedgerX – Trading Journal

Early-stage trading journal with Django API and Next.js frontend covering auth, accounts, and the initial journal data model.

Tech Stack: Django REST Framework, Celery, PostgreSQL, Redis, Next.js, TypeScript, Tailwind CSS

23. Ubiquify Website

Company marketing site with services, blog, and contact forms. Content is managed in Strapi and rendered with Next.js.

Tech Stack: Next.js, Ant Design, Tailwind CSS, Strapi, PostgreSQL, S3

24. Atomic Asher – Creative Studio Website

[Project Link](#)

Studio website built with Astro and Tailwind, covering projects, team, and dark mode in an editorial layout.

Tech Stack: Astro.js, Tailwind CSS, TypeScript, CSS Grid

25. Maisonette – Premium eCommerce Platform

[Project Link](#)

Premium e-commerce storefront with Klaviyo and Narvar in the order path. Worked across Rails and Next.js on production features.

Tech Stack: Ruby on Rails, Next.js, TypeScript, Klaviyo, AWS, CI/CD
